

Cell Run Process

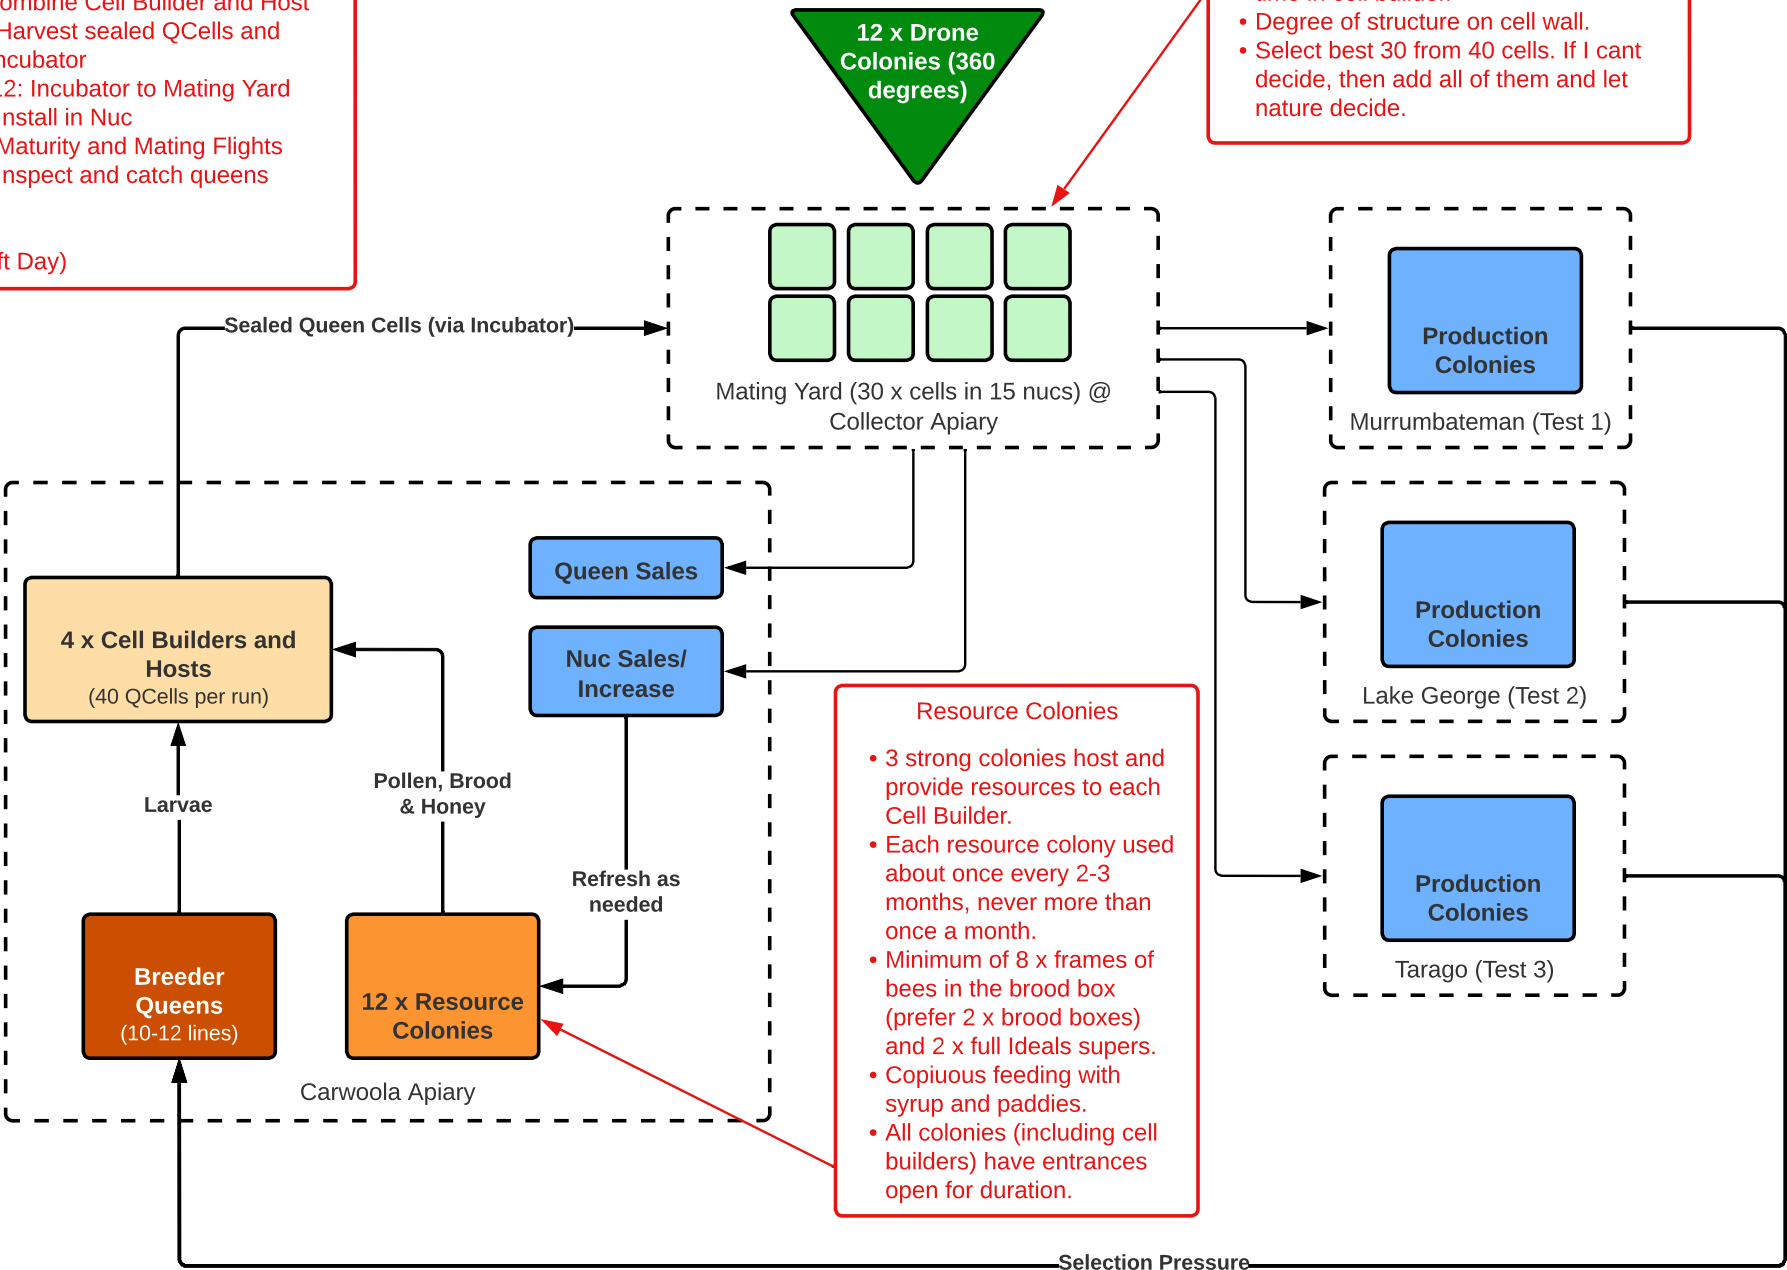

GD -5: Provision Cell Builder from Host
GD -2: Split-off Cell Builder
GD: Add grafted larvae and pollen
GD +5: Combine Cell Builder and Host
GD +10: Harvest sealed QCells and place in incubator
GD +10-12: Incubator to Mating Yard
GD +12: Install in Nuc
GD +21: Maturity and Mating Flights
GD +30: Inspect and catch queens (earliest).

(GD=Graft Day)

Q Cell Selection

Select on following

- Size
- Amount of royal jelly available during time in cell builder.
- Degree of structure on cell wall.
- Select best 30 from 40 cells. If I cant decide, then add all of them and let nature decide.

Resource Colonies

- 3 strong colonies host and provide resources to each Cell Builder.
- Each resource colony used about once every 2-3 months, never more than once a month.
- Minimum of 8 x frames of bees in the brood box (prefer 2 x brood boxes) and 2 x full Ideals supers.
- Copious feeding with syrup and paddies.
- All colonies (including cell builders) have entrances open for duration.
